RAINY DAY

I put on my coat
And boots on my feet
I put on my hat
And stroll down the street

The rain falls down
From the clouds above
Splashing in puddles
Is what I love!

DO YOU KNOW...

DO YOU KNOW...?**Dolphins**

Dolphins sleep with one eye shut and one eye open so even when they're sleeping they can find their way to the surface of the water to take a breath of air.

Camels

Even though camels have humps, their spine - or backbone - is straight. The hump is made of sturdy towers of fat and grows above the spine.

Sharks

Sharks lose a lot of teeth in their lives, but they never run out. New teeth grow in again and again. A shark can use up 20,000 teeth in its life.

Monkeys

Howler monkeys, which live in Central and South America, hang out together howling so loudly they can be heard from three miles away.

Learn the poem.

I see a bed, b, b, bed,
I see a bee, b, b, bee.
I see a bus, b, b, bus,
I see a bear, b, b, bear.

Ant Ant _____*Apple Apple* _____*Bear Bear* _____*Ball Ball* _____

WHAT AM I?

I am made of glass.
I hang on the wall.
You often look at me.
You can see yourself in me.

I am on the wall.
I am dark.
I am usually black or green.
You can write on
me with chalk.

I have teeth.
I'm made of metal.
You use me to eat.
You pick up food with me.

HISTORY OF TELEPHONE

People have invented many useful devices. One of the most interesting and widely-used inventions is the telephone.

The modern phone that we use today is the result of work of many people. The first person to have patented the telephone in 1876 was Alexander Graham Bell. He is credited as the inventor of this practical device. Other scientists who also worked on telephone invention were Elisha Gray, Antonio Meucci, Thomas Edison and some others. The 20th century was the era of phone development and modernization. Rotary telephones were replaced by touch-tone dials and other sophisticated features.

Modern phones are presented mostly by mobiles, which support IP telephony and wi-fi. It is almost impossible to find a person nowadays who doesn't have a personal mobile phone. These phones have become highly popular over the last years. They are rather compact, handy and easy to carry around. Mobile phones allow us to make instant calls, send text messages, listen to music, play games, take photos, check an e-mail and else. Thus, they have replaced not only landlines but also personal computers, MP3-players and cameras.

However, there are many people in the world who are against mobiles phones. Doctors claim that this device has a bad effect on people's health. It can damage our eyesight and immune system. The signals that are sent from mobiles can be harmful. Some people also believe that phones prevent live communication. And, it is true. With the appearance of mobile phones and computers people meet up with friends less often.

AUTUMN SONG

Autumn leaves are falling,
Falling to the ground.
Autumn leaves are falling:
Yellow, red, and brown.

Falling, falling, falling
To the ground.
Falling, falling:
Yellow, red, and brown.

Pick them up and gather
In a pretty bunch,
Autumn leaves are falling
In the parks they crunch.

Falling, falling, falling
To the ground.
Falling, falling:
Yellow, red, and brown.

The Ant and the Grasshopper

In a field one summer's day a Grasshopper was hopping about, chirping and singing to its heart's content. An Ant passed by, bearing along with great effort an ear of corn he was taking to the nest.

«Why not come and chat with me,» said the Grasshopper, «instead of toiling and moiling away?» «I am helping to lay up food for the winter,» said the Ant, «and recommend you to do the same.» «Why bother about winter?» said the Grasshopper; «we have got plenty of food at present.»

But the Ant went on its way and continued its toil. When the winter came the Grasshopper found itself dying of hunger, while it saw the ants distributing, every day, corn and grain from the stores they had collected in the summer. Then the Grasshopper knew..
